The tone of the book is often determined by your book cover design as well. A boring and unattractive book cover might prove to be a push factor for potential readers, while a catchy and vibrant book cover might even catch the attention of people who might not otherwise be interested in the book. The overall feel of the cover is elegant and smooth at the same time. This book cover can be chosen for light, fun mode or even those books that cover sensitive subjects in a lighter tone. Many publishers and authors often design their own book covers in programs like Adobe Photoshop. Book cover designs are carefully selected due to the fact that they present an overall picture to the reader with respect to the information contained in a book. However, many paid and unpaid designs and templates are also available that are easy to customize. Therefore, a book cover design has great importance in the success of a book. The colours and material used must match the contents of the book. Some of which are: It should be professional, formal but catchy and attractive. This can be a cover to go to, as it is quite appealing to the reader's eye. It is divided into two parts, the top mentioning the edition of the book and the name of the author, while the bottom includes the title of the book, its brief description also. Also, as the name serves for the purpose of a person's identity, to some extent, the same purpose is served by book covers. Therefore, the main purpose of a book cover design is to attract the maximum number of readers and potential readers to the book, as well as to sell the maximum number of book copies. The design should also be based on the type of book.
